Wiedenbach Apparatebau GmbH is your innovative partner with special expertise in industrial product marking via inkjet.

More than 25 years of experience, subsidiaries in the USA and the United Kingdom as well as a long standing, worldwide operating sales and service network enable Wiedenbach to offer first class marking and coding solutions exactly tailored to customer's needs.

Our slogan „Individual Inkjet Marking Solutions“ is also reflected in our extensive product portfolio which does not only consist of inkjet printers and a wide variety of inks but also of the development, construction and installation of complex systems up to fully automated product marking solutions.

The following pages shall give you an overview about our company. I hope you enjoy reading the lines and thank you for your interest in Wiedenbach Apparatebau GmbH.

Moos, June 2008

Frank Eickenberg
General Manager

FOREWORD GENERAL MANAGER

CHRONICLE FROM TWO-MAN OPERATION TO GLOBAL PLAYER

4

Wiedenbach Apparatebau GmbH was founded in 1983 as a two-man operation in a garage. From then on inkjet printers have been developed, constructed and produced autonomously. The company has been growing fast and shortly after the first inkjet printers from Lake Constance - made in Germany - were exported worldwide. A sales and service network has been established globally.

In 2004 Wiedenbach was acquired by Domino Printing Sciences plc. Since then Wiedenbach has been part of the Domino Group but is still operating with its own trademark - being the specialist for complex marking applications in the inkjet sector as well as automated product marking and coding solutions within the corporate group.

The worldwide sales and service network is still being extended.

25 years of experience in the field of non-contact marking are also being reflected in Wiedenbach's inkjet printers.

Wiedenbach inkjet printers mark

- 1 to 4 lines of high quality text
- Symbols
- Barcodes (EAN 13, BC 39, EAN 128, 2/5i, UPS A, POSTNET)
- 2D data matrix formats

with a variety of inks

- in brilliant colours (white, orange, light blue, red, green, etc.)
- with various features (fast drying, high temperature resistant, nitrate free, water washable, excellent adhesion properties, etc.)

on various materials

- Plastics (PE, PA, PP, PS, PVC, ABS, etc.)
- Silicone
- Rubber
- Metal
- Glass
- Porcelain
- Textiles

Wiedenbach's inkjet systems convince through excellent print quality with high contrast inks. Maximum operational availability is ensured by short set-up and service times and best performance in connection with easy handling and reliable operation even at highest production speeds.

INKJET PRINTERS NON-CONTACT MARKING

5

WIEDENBACH SYSTEMS MORE THAN JUST AN INKJET PRINTER

Wiedenbach Systems is the center of excellence for automated product marking solutions within the Domino Group. Leading global companies are using Wiedenbach equipment - day after day. The marking and coding demands are as various as the production environments.

Marking systems (internal inkjet printers, laser and third party systems) are integrated into existing production lines or are implemented as complex automated system solutions even as stand alone units.

From a single axis (X, XY and XYZ axis systems) with an inkjet printhead moving over a conveyor belt to the most complex printing systems with multiple heads, camera control and machine control (e.g. for fault marking) or high speed cable marking systems - Wiedenbach Systems has always the best solution for your coding needs.

Our solutions are used by customers in many different sectors and production environments worldwide. Nevertheless, our special focus lies in the following industrial sectors:

- Wire & Cable
- Automotive (airbags, tyres, pipes, brake pads, etc.)
- Electronics (PCBs, switches, connectors, etc.)
- Extrusion (tubes, hoses, profiles, etc.)
- Steel (plates, pipes, wire, etc.)

Long-lasting practical experience in these sectors, specially developed inks as well as exactly tailored soft- and hardware in combination with the possibility for complete automation of the printing process make Wiedenbach a preferred partner in the marking and coding industry.

WIEDENBACH TEAM YOUR GUARANTEE FOR SUCCESS

8

Wiedenbach is successful because of its people. People who are experts in their fields contribute their vast experience and know-how on a daily basis to ensure a successful and efficient working environment.

At present Wiedenbach employs around 100 people worldwide, 80 of them are based in Moos. Our international team has always the best solution for your company in mind. As a team of experts we focus on efficient decision-making, clear responsibilities and well-organised interfaces.

1983: Two employees. 2008: Around 100. Despite of the rapid growth of our company it was always of high importance to us that there is a balanced mix of experienced long-term colleagues and the dynamics of young personnel. That is one of the reasons why we are training our apprentices not only in the commercial but also in the technical field to generate the basis for our own successful future.

Guaranteed through our extensive global operating sales and service network a specialist partner for Wiedenbach marking solutions can easily be found near you.

- Direct subsidiaries in USA and UK
- Distributors in more than 40 countries worldwide

For detailed and always up-to-date contact information please refer to our website.
