

# WP Series Accessories

## Precise Cable Marking

### Extension Set WP - Fully equipped

Cable Guiding Unit for precise cable coding. The complete set contains all available options, supporting maximum precision and flexibility of WP Series printers.

#### > Extension Set WP - Basic

Base configuration including cable infeed, encoder for accurate position measurement (2000 PPR), print head fixation with precise vertical and horizontal fine adjustment. Dimensions in mm (WxHxD) 550x200x300

#### > Extension Set WP - Option Straightening Unit

Ensure straight cables and straight code – available as single horizontal and vertical units or in combination.

#### > Extension Set WP - Option Fixation Print Position

Precise coding requires precise cable guidance. This option ensures a well defined printing position of the cable relative to the print head, as required for high quality codes. Containing 2,3,4,5 and 6 mm inner diameter sockets.

#### > Extension Set WP - Option Cable Brake

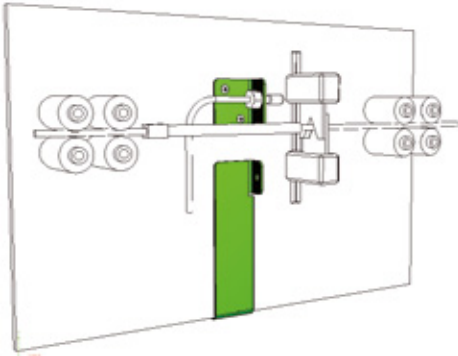

Improves yield by avoiding return motion - adjustable to cable diameter.

# WP Series Accessories

## Precise Cable Marking

WP Series Wire Processing

### Cutting Knife Sensors

Availability of a cutting knife signal is obligatory for WP series operation. If not available from the electrical interface of the cutting machine, it can be optically or inductively detected by a sensor (see sketch).

- > Product sensor, fibre optic – set
- > Product sensor inductive, M12 with connecting cable

### Encoders

For precise measurement of the cable position.

- > Shaft encoder (2000PPR) with cable and clutch
- > Shaft encoder (2000 PPR) with running wheel and extension arm
- > Shaft encoder (2000 PPR) with spring loaded running wheel

### Print Head Support

For solid fixation of the print head at a wire processing site.

- > Print head support Type 31 (head fixation only)
- > Print head support Type 32 (incl. vertical and horizontal fine adjustment)
- > Print head support Type 33 (incl. encoder and guiding prism)
- > Print head fixation for tilted print heads

### Installation and Cooling

For the safe, yet mobile placement of WP Series.

- > Trolley table, stainless steel
- > Air-condition for hot production environment

### Maintenance and Cleaning

Always ready to go – thanks to high performance maintenance and cleaning kits.

- > Care Kit CS 405/WP 405
- > Care Kit CS 407/WP 407
- > Maintenance kit for printers without condenser
- > Maintenance kit for printers with condenser
- > Ultrasonic bath 230 V/120 V
- > Service station
